ILLEGAL SLAVERY.

One of the last acts of injustice and in-mannity which we would naturally expect from an enlightened and just people would be an illegal retention of freedmen in slavery by Englishmen. From the nation which gave us Wilberforce and Clarkson, the founders of the modern anti-slavery movement, the nation which freed her own slaves at an expense of £20,000,000, the

slavery by Englishmen. From the nation which gave as Wilberforce and Christon, and the Savember 23, 1876, is an sixues at an expense of 24,000,000, the nation which fared her own follows: sixues at an expense of 24,000,000, the nation which has spread anti-slavery movement, the nation which fared her own follows: sixues at an expense of 24,000,000, the nation which has spread anti-slavery doctrines throughout the world, maintained fleets upon the six for the suppress, from such a nation we would expect to find an person nor corporation capable documnitizing annet of aggression upon the liberty of single human being. On the contrary, we work as the contrary we work of the single sower the integrity and enforcement of these own subjects are concerned.

It is with surprise, therefore, that we shall be suppressed and working under Lugish laws with its head office in the great Digish laws with its head office in the great Digish laws with its head office in the great Digish laws with its head office in the great Digish laws with its head office in the great Digish laws with its head office in the great Digish laws with its head office in the great Digish laws with its head office in the great Digish laws with its head office for the great Digish laws with its head office for the great Digish laws with its head office for the great Digish laws with its head office for the great Digish laws with its head office for the great Digish laws with its head office where the great Digish laws with its head office where the great Digish laws with its head office where the great Digish laws with its head office where the great Digish laws with its head office in the great Digish laws with its head office where the properties of the great Digish laws with its head office where the great Digish laws with its head office in the great Digish laws with its head office he profite of the great Digish laws with its head office in the great Digish laws with its head office in the great Digish laws with the great Digish laws with the gre

in the city of London.

'The proofs of this charge are clear and conclusive. It is no longer a vague report, such as has been repeated for years throughout the province of Minas Geraes, nor does it test upon hearsty evi-

port, such as has been repeated for years at throughout the province of Minas Geraes; nor does it rest upon hearsay evidence. The proofs upon which the charge is now made is the contract itself, and upon various official and authenticated documents, which clearly prove the conspiracy and commission of the crime of illegally reducing a large number of emancipated blacks to slavery. The documents and proofs are as follows:

On the 27th of June, 1845, certain directors of the English company named The Brazilian Company, working at Cata Branca, and the S. João d'El-Rei Mining Company, of Morro Velho, Minas Geraes, met in the city of London and signed acticles of agreement for the living of 365 slaves, belonging to the Cata Branca company, to the S. João d'El-Rei company, and the sale and transfer of their mining estates and plant. An agreement had been

longing to the Brazilian elempany; and the second schedule is lating to its plant and the City Brane mines.

Signed in presence of J.N. Spursov, solicitor, 62 Monigate Sh.

Glo. Hadir RN, Robert Cottshorid, Rr. Hodins, A. T. Folikel, F. J. Van Ziller.

gard in presence of cour Prios, Deros, Great Worldester,

In due time the current went int ffectual the mines, plant and slaves of the corporate life on the part of this company, no record of meetings, reports, elections, not even of an office. Its clear'y manifest of intention, as shown by the sale of all its mining property, and by its ultimate provisions for the freedom of its slaves, was to dissolve. That this intention was carried into effect is shown by a letter of liferty granted to Domingor, a child of Madicas B and Lucinda, two of the lifted slaves, in 1856 by Thomas Walker, the then experintendent of the Morro Vellio company, in which he declares himself the trepresentative of the extinct English-Brazilian com-

The state of the second se

pany, called in Brazil the Cata Branca company. Again in 1869, in a letter of liberty granted to Antonio C. Mazambique, by the their superintendent of the Marra Vellio comp.ng. James Newell Gordon, the almees named black is expressly derland to have been the slare of the extinct company of Cata Bianca."

The non existence of the Cata Bianca company being this shown, not only by its own will and act, but by the explicit declaration of its representative at Mario Vellin, it follows minimally that nothing could legally intervene to prevent the com-plete entirorpation of the Cata Branca blacks in 1859, according to the terms of the above contract. Just here the purpose of canceling the contract of the 5th of May, 1845, becomes apparent, as by the laws of this country the ilead of sale of the Cata Branca estates required registry in Brazil, unlife the private agreement for the bring of the slares dall nat. It follows, therefore, that the contract alone given was never recorded here and consequently known to the Brazilian officials. When, in 1859, some of the libriks applied to Mr. Gordon for their freedom, having money threfor in a fund then in the hamls of the company which had been transferred to it by its predecessor at Cata Branca, he refused their request and said that they would have to syrve ten years longer. By thy limit act of the Cata-Branca company and by the express agreement of the S. Joan il El-Rei company, every one of these slaves should company, every one of these stares should have been set at liberty in 1859, but we have here the explicit refusal of the super-intendent of this last company to grant such freedom even though there was a fund established for this purpose. And furthermore, although the S. Joao d'El-Rei company pledged itself to free all minors on their attaining the age of twenty-one years, no une instance has been discovered of such an act ever having been done. results of this shameful injustice will readily be seen when it is known that the children and gramb hibben of the minors of 1845 are now slaves to the mining company of S. Juao al El-Rei.

This state of affairs at Mooro Velho contimed rushinged up to the year 1872. The contract by which the Cata Branca blanks were to "bacom asolutely five underminipola" in 1859, and in which the S Join of RI-Rei company subminly pledgal itself to "give and grant them their freedom ac-ordingh," In any safety halacmaway in Loudon, the managers that mot sample to recast these unfortunate people on slavery—a slav-ery of the most labornous and one one in his acter as all who are acquainted with Bio-zilian mining will agree. The law of Sep-tember 28, 1874, Art No. 2,040, homeon, introduced an unforescent contingency into the institution of Biazdour slavery, and its effect upon the Morro Vellio scheme was clear and direct. By the times of that law all blacks who were to be treated as slarge were to be matriculated lictore, the 30th of September, (872—which time mas, in cer-tum cases, afterwards extended another year —and all briks having its corners were alectated free. By the provisions of this law, therefore, as well as by the terms of the contract of 1845, three blacks were entitled to their freedom; it follows therefare, that they were justly entitled to plan-ages for twelve years of illegal slavery. But, Cata Branca company passed into the hamble in face of all this, we find James Newell of its more prospectors neighbor. Since Gordon, superintendent with S. João d'Elthat transaction we have no record of any Rei company and British vice consult for Minas Geraes matinulating 213 blanks as slaves for lift, and signing his name to the record at Sthara, as the representative of The Brasilian Company of Cara Branea which he hauself and his prederesso. Dr Walker, had declared to be extinct. In view of the injustice already alone and the legal penalties mentred should the marter become public, it is clear that Mr. Godhar san no other nay out of the abliquity than to matricular ethem as slaves for life and to establish his right to do so by assuming to represent a company long since extinct.

RIO DE JANEARO, SLITEMBER 5TH, 1879

IN THE MATTER of Wilson vs. Church the High Court of Justice granted an extension of time to September 2 in order to enable the appellants to prepare their case for the The original date, Aug-

ust 1, was found to give insufficient time for printing all the documents, hence the further extension. Just how long it will take their lordships to digest all these documents is problematical. In their zeal to "sift" the matter thoroughly "a " all unlikely that their lordships will visit the grounds in propria persona

THE CHART showing the comse change on this market since 1851, which we give our readers a fuller and more comprehensive idea of its fluctuations than can be obtained in any other way. This method of indicating the general course of exchange has long been used in England and the United States and has been found to be of great service in giving a quick and commehensive idea of the subject. As to the harp angles and great irregularities of the "exchange line," our readers will draw their own conclusions. In a state of financial health and industrial prosperity, unin fluenced by war, pestilence or feverish speculation, this "exchange line" should have only gentle curves, rising above and falling below the "par line" like peaceful waves above and below the level of the sea. The great problem for the Brazilian statesman to reduce these angles to curves, and to hold the line more uniformly to the line of "27 pence.

AFTER A MINUTE examination of the port of Maranhan, which occupied a large part of two or three days, the Barao de Telfé and his fellow commissioners have decided that Maranliño has a suitable port for the American steamers, better even than that of Pernambuco. The world is indebted to the Pernambuco. The world is indebted to the titled engineer for this surprising discovery, even though it is slightly discredited by the experience of many shipmasters and mer-chants. The Barto, however, is wholly independent of these annoying factors; he instituted a search for deep water and found it what more can Maranhijo ask? If there are dangernas rocks, as was the case at Surtos, and shoals, that is a matter entirely independent of his purpose. The steamers can do as they please about running upon them. Even the contingency of the entire withdrawal of the American steamers from the northern ports, which we heartily advise em to do in case of a compulsory service Maranhão, has no termis for this illusvious engineer; his line of duty took him into deep water and there he has anchored his case. What, now, does the government monase to do?

THE FOLLOWING figures taken from a recent report of the inspector-general of public works shows the gradual illiminuition in the water signily of this city since the the month of March last. In March the average daily supply was 7,273,548,5 gallons m May, 5,829,330, 3 gallon ; in July, 4,383,c 342 + gallons; on August 1st, 3,481,665 gallons, on August 22nd, 2,631,822 gallons. Assuming the population of the city to be three hundred throusand, the water supply of the 22rd off, cave an city to be three hundred thorsand, the Less than two fifths of it have been taken a control and the third water supply of the 22nd off, case an alranced prices and insums which indicate average quantity of 8.77 gallous to each popular subscriptions; and out of all this mesofficient to meet the necessities of a crowdent of the control of the control

included in the inspector general's returns, but this supply would alter the result only in a slight degree. If it were possible to estimate the number of animals, steam engines, street sprinklers, etc., etc., depend ent upon this same supply and then deduct the quantity used by them from the daily the quantity used by them from the daily distribution, the quantity remaining for drinking, cooking and bathing purp would be most alarmingly small. It be observered that we have assumed the population to be three hundred thousand individuals. Were we to take the more commonly accepted figures, varying from three hundred and fifty thousand, the result would be far more alarming than that which we have deduced from the minimum esti mate of population. The matter is one which demands prompt and thoughtful attention on the part of the public officials, and they should see to it at once that there shall be no further waste nor innecessary use of water in the city.

DEFUTY Ignacio Martins, of the comarca in which the Morro Velho mines are lo cated, in his address on the question of the illegal retention in slavery of the Catta Branca blacks, said, "these slaves, I assure the noble deputies, are in a municipal-ity in which they can have full confidence that full and complete justice will be done."
In the same discussion Depaty Galdino das Neves, of the same province, said that the fact of this illegal slavery was public, that he had known it many years, and that every-body in Minas knew it Deputy Mattins further stated that Antonio Carlos Rebello Horta gave information to the municipal judge of Sabará (in 1872) that these slaves were free since 1859 and that the judge Dr. Chassim Drummond began proceedings and appointed a guardian for the negroes And further, soon after this, the matter wa again brought before the public by a cor-respondent of the Jornal do Commercio. In view of these lacts we would ask the Deputy from Minus if his assurance is not just a little ill-timed. If this great injustice has been known "many years," and if proceed-ings were begun in 1872 for the freedom of men illegally enslaved without securing that freedom up to the present day, is it not time to appeal to some other powers than the judicial authorities of Sabará? If these an thorities can accomplish nothing in seven years, and are content to see these blacks left in the mines by their guardian unde all their former conditions and obligations of servitude, is there not something o bombast in the assurance that we can have 'full confidence' in them? The simple truth is that these authorities reside a little too near the nehest gold mine in Brazil. We trust that the Chamber will not stand on ceremony, but will probe the whole matter to the hottom.

According to the official report of the treasury officials upon the new 4 1/2 per cent lean of 50,000,000\$, published on the 3rd instant, the total amount subscrised was 123,604,000\$. Of this amount, 121,655. cons were taken in this city, the remaining 1,949,000\$ being distributed throughout the various provinces of the empire. The rates at which the subscription were made varies from 96 to 100 : only 11,000\$ being taken at the latter rate; 15,000\$ at 99; 429,500\$ at 98; 177,500\$ at 97 1/2; 16,848,000\$ at 97; 2,427,500\$ at various fractions between 96 and 97; and 103,695,500\$ at the minimum rate of 96. Of the latter sum only 709,000\$ was subscribed in sums less than 5,000\$; which have the preference under the stipulations of the loan. It will be seen, therefore, that the loan has been largely taken by hanks and capitalists. The subscriptions at rates above 96 amount to 19,908,500\$, leaving 30,016,800\$ to be emitted at the minimum price. The average rate at which the loan is emitted is 96.37, making an actual emission of nearly fifty-one thousand nine hundred contos necessary to realize the amount asked. Taking all these factors into consideration, it is evident that the treasury has made a signal failure in its attempt to make the loan a popular one and to realize better prices by the operation. Less than two-fifths of it have been taken at

sanitary condition of a large city. It is true that there are some other sources of water supply of a private character not ments for the transaction of business connected with the receipts of instalments on the subscriptions and the payment of interest. Had the minister of finance accepted the guarantee of the banks to place the loan at 96, the net results would have been equal to those now realized, and the moral effect would have been infinitely greater. have before stated, the placing of a 4 1/2 per cent. loan at 96 would be considered a financial success in view of the present con-dition of things in Brazil. There was no need of an expensive demonstration that this The recent attack of several prominent journals upon the English banks of this city,

because of their withdrawal from the exchange

market, and the general course of the Banco do Brazil in its attempt to bolster up cx-

occasion for regret not because of the per involved, but because of

widespread ignorance of the simplest rudi

ments of finance which it exhibits, and be-cause of the serious danger to which the

change, is occasion for deep regret.

country is exposed through the dominance of an unsonnil, arbitrary policy. If the banks in question were engaged in a conspiracy to depress exchange and injure the credit of the country, then there would be just reason for censure and for a combination of Brazilian banks against them; but we can not believe that the English manager are so foolish as to engage in any such at tempt. It is hardly possible that these gentlemen could occupy their present posi-tions and be ignorant of the results of such an enterprise. prise. The rising and falling of ex-is independent of individuals or combinations; it is a manifestation of the working of economic laws as clearly defined and unchangeable as the laws of gravitation While it is possible to "bull" and ". ear" the market for a brief interval, it is utterly im possible to control it. Not even the Banco do Brazil, with all the moral and material forces of the government to back it, can accomplish such a result. We need no better illustration of this principle than the state of the market to-day. We have now a combin ation of causes tending to elevate exchange the withdrawal of a large amount of capital from this market by the new loan, nearly all of which is subscribed in this city, the un precedented sales of coffee, the failure of crops in the north, and the efforts of the Banco do Brazil to "bull" the market. After the entrance of this great bank upon the exchange market and under the influence of these other favoring conditions of business the rate advanced rapidly to 21 1/2 where it now remains in spite of all the fav orable conditions of business. Under nor mal circumstances, the advance would have been steady and continuous as long as the unusual demand for exchange existed, and then we should expect a reaction, little or great as the state of business demanded We have mentioned the prominent factors tending to elevate exchange; the opposing forces are beyond any ordinary effort of enumeration. It is well-known that the favorable conditions of the exchange market to day are only temporary. The government will draw its fifty thousand conto from the market to pay its debts and interest accrning and accumulated, and the money will be scattered broadcast; the large sales of coffee will not last; the north will con-form its requirements to its reduced resources; and the Banco do Brazil, like all its long line of predecessors, will soon reach the bot tom of its cash box. And then, under the influence of an unsound business and ar nufavorable treasury balance, augmented by the reaction sure to follow the present effort to "bull" the market, a quick and marked depression will be sure to follow. It is evident that the English banks are cognizant of these probabilities, and undonbtedly of others which we have not mentioned. It is certain that their withdrawal from the exchange market is a matter of business, pure and simple.

LEGISLATIVE NOTES.

-The Senate has been very steadily work since our last issue, being much more industrious of the two houses. There has been the usual amount of private legishas been the usual amount of privace regulation, consequently the usual amount of time wasted. The discussion in second reading of the estimates for the department of empire closed on the 27th ult., and the Senate then entered upon the discussion in second reading of the estimates for the de partment of foreign affairs, which has since occupied much of the time. The amender hille naval estimates relating to the 1880-81, and the supplementary credit for the new abattoir were received from the Cham-ber on the 29th. On the 30th the supplementary credit for the department of em pire on behalf of the secra, was the subject of a favorable committee report. The original sum asked on the 3rd of February las was ro,000,000\$; but in view of the in-creased expenditures at the time of its consideration, the Chamber increased the credit to 20,000,000\$. With the amounts exthe minister of empire with the General Assembly and the credits since opened, the grand total of government expense in be-half of the sécca up to the 27th ult. was 54, 144, 446\$376.

—There has been some slight improve-aent in the attendance of deputies during the past ten days, though there is still man-ifested no slight disinclination for regular work. There has been a great variety of subjects before the Chamber, varying from the regular and supplementary credits asked for by various departments, to bills for the reorganization of municipal boards, conces sions, aids to labor, cane disease, etc., etc. On the 27th concessions were introduced for Theodore Christiansen, of Pernambuco for the manu acture of thread from the fibrons epicarp of the fruit of the cocoa with exemption from duties on all materials neces sary to the manufacture, and a ten years privilege to Guilherme Schuch de Capanema for the manufacture of sulphurete carbon. On the 29th the question concerning the retiring Italian colonists in Santa Catharina was brought before the Chamber by Deputy Mello e Alvim who condemned the administration of the director. Carvalhe Borges, in the strongest terms. An attempt was made to defend the director by Deputy Lourenço de Albuquerque, but with little effect; the proofs of his mal-administration were to strong. The extraordinary credits asked by the minister of foreign affairs re-ceived a favorable report on the 27th, and

the naval estimates were passed on the 20th.

—The case of the illegal retention in slavery of about 200 blacks, formerly slaves of The Brazilian Company, of Catta Branca, now extinct, by the S. Jodo d'El-Rei Mining Company, was brought before the Chamber on the 26th inst. by Deputy Joaquim Nabuco. After narrating the history of the transaction by which these slaves came into the possession of the latter com-pany at Morro Vellio, and the subsequent evasion of its obligations under the contract in which absolute freedom was gua anteed these slaves in 1859, the speak made an eloquent plea for the rights of th poor blacks who have now been kept in an illegal slavery for twenty years. To the pointed interrogatories of the speaker-"I ask if it is possible to inscribe in the book of matriculation more than 200 persons as slaves of an extinct company? if an extinct company can possess slaves and have them matriculated? if there can be slaves who have no owner? who is the owner of thes slaves?"—no satisfactory reply was given in favor of the accused company. Deputy Ignacio Martins spoke to some length on the question, admitting that the blacks were entitled to their freedom, but contending that the courts, where proceedings already commenced, were competent to deal with the matter. Deputy Joaquim Nabuco's request for information from the minister of justice was then read and passed, in which it was asked: who are the owner of these slaves? has the government knowledge of the contract of June 27, r845 what means have been taken to guarante-liberty to these slaves and punish those who illegally reduced them to slavery after their emancipation?

-The bill appropriating 200,000\$ for the study of the disease affecting sugar cane in Pernambuco, and for the purchase of fresh seed, passed its first reading on the 20th and entered into discussion on its second reading.

This project, once so innocent and modest as to inveigle the energetic Pernambuco deputy, Joaquim Nabuco, into a hearty sup-port of it, is now assuming proportions and features of an astonishing character. No sooner had the project entered on its second reading than a Rio de Janeiro deputy wanted the coffee-tree disease of his province included, then several Bahia deputies wanted 'Bahia and other provinces' included, then the Paraliyba deputies wanted their province named, and then Deputy Malheiros of Matto Grosso capped the climax by proposing that the disease among the horses and mules of his province should be included. Nothing now remains but the amendment of the celebrated Mineiro, Galdino, which of the celebrated almero, disclaims, which will call for a commission on the biches de pl which cause such dreadful ravages in his province. We are glad to see that Joaquim Nabuco has discovered the fat little jobs in the scheme and is making an effort to september 1. arate the study of the sugar cane disease, which is a commendable measure, from the seed bureau, which can safely be dispensed with.

-On the 26th ult. the minister of foreign —On the 26th ult. the minister of foreign affairs applied to the Chamber for an extra-ordinary credit of 120,000\$, at the par of exchange, to meet the expenses of the special mission to China. This credit is intended to defray the expenses of Dr. Eduardo Callado, at present in London, and two or three vessels on a special mission to China for the purpose of entering into a commercial treaty with that country and negotiate for a convention between the two countries in relation to introducing Chinese labor

—The miserable and inartistic character of the engraving of the bank notes of the old issues of the Brazilian tteasury and the Bank of Brazil, many of which are still in circulation, is positively an invitation to the adventurous and not too scrupulous to which are still in circulation, is positively an invitation to the adventurous and not too scruptonic tailon to the adventurous and not too scruptonic to enter into the business of counterfeiting. Just before the City of Rio de Tonieur, but New York, Sr. João Benecio Bebelaque, an enterprising Brazilian, was arristed by a special detective as one of a party who had been engaged in preparing a batch of counterfeits of the old notes for circulation in Brazilian, and just as the scaemer sailed from the dock, another Brazilian, an accomplice of his, was taken into custody, after having delivered two eiters to the puser for Pernamhuco and Rio de Jaueiro. These letters were delivered to the American consuls at these prots where doubtless this government will take the proper means to possess themselves of them, after the result of the hearing of the counterfeiters in New York is communicated through the usual change. The young man who was arrested on the dock had taken his passage by the City of Rio for Pernambuco, and it is said that a brother in thaw was quite disappointed at not finding him on boand. Mr. A. G. Coodale, the president of the American Bank Not Company was chiefy instrumental in detecting the fraud and in having the warrants issued on which the arrests were made.

THE RIO NEWS

— The Pacific Mail packet, Britannia, left Lisbon for this port on the 29th ult.

for this port on the 29th uit.

— The steamer Genelopus was libeled in the U. S. district outra' at Bultimore, July 23, to recover a balance of \$200,56 due out of an indebtedness for supplies contracted in New York.

— The steamers Ontario and Morrimor, of the old Garrison line between this port and New York, have been purchased by Nehmahia Gibson, Eaq., of Boston. It is not announced what service they will enter upon. The first was built in 1867, the other in 1862.

— The bank Y. H. Invested Administration.

in 1002.

The bark Y. II. Ingernoll clearing at New York for this port July 26, manifested 375,569 feet of lumber, 11 bales newspaper, 50 cases perfumery, 99 pkgs domestics, 16 cases sewing machines, and 186 barrels rosin.

ion barries rosin.

—It is proposed to hold the projected exposition of Canadian products and manufactures in the rooms of the Typographia Nacional, from July to October next year. The issual steps are now being taken for procusing exemption from custom house duties on the exhibits.

on the exhibits.

—The new water works have now reached a point about sixteen kilometres from the city. The authorities amounce their intention to provide the shipping with water from the mains which pass near the port of Pavuna, to which the steam launches can easily go for this purpose.

go for this purpole.

—On the 28th this the managers of the Portuguese exposition received members of the press of this city and gave then an opportunity to test the quality of eighty-one varieties of wine. The opportunity was not neglected and everybody came away highly delicitied. delighted.

was not neglected and everybody came away highly delighted.

—A meeting of The Brazilian Navigation Company took place on the 30h alt. for the transaction of the regular business of that company. The directors of the past year were re-elected, and Mr. Megaw, of Norton, Megaw & Co., was chose to fill a vacancy. The company decided, among other things, to effect its insurances in England, owing to the trickiness of the Brazilian companies.

— The American packet City of Rio de Janeiro, arriving at this port on the 28th ult., reports a pleasant and successful voyage. Since her last voyage to this port this steamer has been throughly overhauled and is now in excellent condition in every way. Sevend changes have been made in her officers; Capt. James F. Lewis succeeds Capt. William Wier in command, and Mr. Henry Holten succeeds Mr. O' Brien in the commissary department. The Rio brings out this time the largest argo yet brought away from New York to this port, there being 7,000 harrels of flour and upwards of 9,000 miscellanests packages. Our thanks are due to the parser, Dr. W. N. Kinney, for information and favors.

—Among the passengers of the City of Rio de

and favors.

—Among the passengers of the City of Rio de Janiero, arriving here on the 28th ult, was Mr. Francis Curran, who connes here for the purpose of establishing a Sailors' Mission at this port. The need of some effort of this kind has long heen felt here, but the time of the English chaplain and Amicran missionaries has been so absorbed in other work that nothing permanent has ever been accomplished. Mr. Curran has had a wisk experience in this kind of work, having been engaged in it in several clities of the United States and was four years in British Honduras as agent of the British Missionary Society. He will enter actively upon his work here as soon as suitable quarters can be obtained. It is needless to bespeak the hearty co-operation of our readers in this enterprise as we feel sure that Mr. Curran's charitable purpose needs no special pleading. We shall amonunce the place and chaateer of the work as soon as Mr. Curran has completed his arrangements.

That he entertained doubts as to the legality of his claim to represent the Cata Branca company's shown by the fact that on the of August following three persons, calling themselves 'directors of The Brazilian Company formerly established at Cata Branca,' the stable of the company formerly established at Cata Branca,' but whose names do not appear as directors in the last act of the expiring Cata Branca company in 1845, signed a document purporting to confirm all his past acts and to confer upon him all needful authority

to comer upon 'mm at uteenin automy in the matter of registering those slaves. This purported authorization is witnessed only by clerks of the S. Joao d'El-Rei company, No. 8 Tokenhouse Yard, Loudon, E. C., mentions no meeting nor resolution of the beard of directors of the Cata Branca company, appears to have no seal nor office address of that company, and beaus none of the marks of an honest, legally-executed instrument.

In reply to a question upon the matriculation of these slaves, the Visconde do Rio Branco wrote to the collector at Sabard, July 8, 1872, "Those individuals can not be considered slaves to whom is conceded liberty upon any condition or onus, and they, therefore, can not be matriculated under Art. VIII of Law 2,040 of September 28, 1871." The Cata Branca blacks, however, had already been instriculated, and in spite of contract, law, opinion, and every sense of justice they are still slaves in the mines at Morro Velho. It matters not that their treatment under the present superintendent, Mr. Morrison, has been greatly improved, immeasurably improved in comparison with their condition under his predecessor. The simple fact that a most inhuman and despicable crime was committed by James Newell Gordon, with the probable knowledge, consent and assistance of the chairman of the board of directors in London, against the freedom of these blacks still remains and demands prompt reparation. It is a crime which we feel sure the English government will not overlook and will not be slow to punish.

In 1877, charges were brought against the S. João d'El-Rei company by Antonio Carlos Rebello Horta Jr., but nothing has grown ont of it but petty, trivial questions which have little or no bearing on the main issue. A curador and depositario were appointed for the slaves, but no change was effected in the situation as the blacks were left in the hands of the company. At the present time the company is demanding that proceedings shall be discontinued and that the legal guardianship over the slaves shall be withdrawn.

LEGISLATIVE NOTES.

The difficulties between Morris N. Kohn and the management of the Dom Pedro II railway which were embodied in a petition to the Senate, were made the subject of a committee report on the 18th uitimo. The report recites the history of Mr. Kirlin's proposition to the railway company for the establishment of an express service in this city, the promises made to him, the subscquent quarrels between him and the managers of the road in which Mr. Kohn's papers were torn up and he was denied admittance to the offices of the company, the require-ment of certain adverse conditions from him, and the final contract between the railway managers and the "Carris Urhanos" company for the same service on the grounds that this latter company offered the greater advantages and security. Mr. Kohn has made his grievances the subject of a petition to the Senate where certain political influ ences can be brought into action, and the report of the committee on the 18th gives an opinion decidedly in his favor. It is probable that the discussion of the report will bring out some interesting disclosures.

-The supplementary credit of 210,074\$ 677 asked by the minister of marine, to meet deficiencies in the appropriations for the fiscal year (878 n), Act 2,792 October 20, 1877, was the subject of a favorable committee report in the Chamber on the 19th. The deficiency is largely owing, says the minister's report, to the increase in the cost of food, it having been found impossible to supply rations on the base of 400 rdis as fixed he

— In the session of the 19th, Felicia dos Santos called the attention of the Chamber to the existing scarcity of mater in this city and to the abuses practiced by the public officials. The occasion of the discussion

pointed, owing to the illness of one of the members of that committee. The peti-tioner then went on to call attention to the rexations and miustice growing out of the present administration. He stated that even in times of scarcity some houses were provided with water, while others in the same street and dependent upon the same source, were unable to get water for days and months. In theory the person posses sing a penstock pays the treasury 3\$ pe month for water rates, but in reality he is month for water rates, but not early ne is compelled to pay the guard a further sum of 58 for turning on the water. And then the people, who do not get water during the three, four or five months of drouth are compelled to pay the regular rates for twelve months. The speaker in concluding stated, and his words should be printed upon the instructions of every official in this city, that the scarcity of water should be equally shared in by all the inhabitants of Rio do Janeiro, because, when the suffering is equitably distributed, it is felt much less acutely. The hobby of the declining years of

the Visconde de Porto Seguro in regard to a removal of the capital to the geographical centre of the empire has at last found anotherable advocate in the emineat Brazilian geographer, Senator Mendes de Al-In a speech on the estimates for meida. the ministry of empire, on the 16th ultt., he referred to the ravages of yellow fever in this city, and to the advantages, in a hygienic point of view, to be gained by the location of the capital in the interior. By this, he argued, we should escape many of the ills which now afflict us. In addition Brazil would then have a modern capital, without slavery; and the great movement to the interior, which would follow, would enable her to conquer the lands which she owns but does not occupy. The districts of the coast would gather a new impetus in their development and Brazilian commerce would at once assume an importance which it does not now possess. The speaker's personal preference in the matter of location was some point on the Araguaya river, on the western boundary of Goyaz. We are in clined to think the location a first-class on for the General Assembly, but wouldn't advise any one else to move out there.

SHIPPING CIRCULAR.

The official Supervising Surgeon-General S. Marine Hospital Service has re-ently issued the following: cently

cently issued the following:

To Modical Officers of the Marine Hospital
Service, and others whom it may concern.

1. To insure to such owners of American vessels as desire the services of Sound and healthy seamen, facilities for the proper plysical examination of crews, at all ports where medical officers of the Marine Hospital Service are stationed, such officers will, upon the application of any U. S. Shipping Commissioners, or of the master or omier of any ressel engaged in the foreign trade, or passenger steamer engaged in consting trade, coaming physically any seaman or seamen, and give a certificate as to their finness or otherwise.

casaming trait, examine juristenty any seaman or seamen, and give a certificate as to their fitness or otherwise.

2. A record will be kept of all examinations of seamen, and a transcript thereaf forwarded quanterly to the Surgeon-General of the Marine Hospital Service.

3. In all cases in rejection, the certificate will state explicitly, in English, the reason for such rejection.

4. The loss of an arm on leg; deferring the constraints of the properties of the constraints of the con

weakness of the body, or denormity, shount cause the rejection of any scantan desiring to ship.

5. No scaum will be examined for the uniques of giving such certificate except in the nessence of a U. S. Shipping Commissioner, or the master, owner, or agent of the ressel on which the scauma is expected to be employed, and examinations will only be made at the Marine Hospital Ollice.

6. The rejection of a scauma at one examination shall not debar him from subsequent examination in case he claims that the disease for which he was rejected has a histophysical control of the provisions of this circular will also apply to enlisted persons in the Revenue. Marine, Life Sarung, Coast Sorvey, and Leght-House Services, and to persons desiring to enlist therein, upon the application of the proper officers of the respective services.

cation of the proper series in estricts.

8. No fee will be charged by any medical officer for making the examination of certificate herein contemplated.

J. B. Hamilton. Surgeon-General U. S. Marine Hospital Service.

officials. PROVINCIAL NOTES

The subscriptions for the new gold Maranhão amounted to 515,000\$.

The Barão de Teffé has completed his exam-ination of the port of Maranhão and reports that the harhor will admit the entrance of the American

steamers.—A conflict has broken out in Maranhão between the bishop and the masons.

—The mercantile community of Maranhão have undertaken to assist the establishment of central factories by subscription, and 400,000\$ have been subscriptiol. This is better than going 10 the public tressure.

Treasury.

—The people of Santos, like those of Rio de Janeiro, are suffering from a searcily of twater.

—Reports from Conceição tha Ponte Nova, in the interior, state that no rains have fallen in that locality since June 14, and great suffering is now felt because of the thouth.

—Up to the 13th mlt, there were twenty-five ves-sels in the post of Rio Grande realting for an op-portunity to cross the bar. On the tash the water was higher and thirteen ressels tleparted. On the 16th ult, there were only eight vessels in port ready

-Rains are reported from the interior of Per-

manistro.

—A server storm occurred at Rio Grande do Sul on the 9th and toth ult, causing considerable damage to shipping along that coast. Seveni small rescale were lost and other, injuried. The 'oldest inhabitant' says that such a storm has not been known for many years. On the 9th the American weed Gerch Banker broke loose from her menlorage and after injuring a Brazillian vessel somewhat, an aground where she remained for a time quite high and thy. The vessel was finally extricated from her perilosus position. Sike was looded the from her perilosus position. Sike was looded instruction from 1835 to 1859, according to the report of the president, the total sum of 3,696,843\$, or alont £415,870.

—The president of the province of Rio Grande do

or alion (A15,870.

—The prevident of the province of Rio Grande do Sul has selected the 27th of October next as the date fue lecting special electors to nonlinate a successor of the late Visconde do Rio Grande, senator. The nonlination will be made November 25th.

monutation will be made November 25th.

According to the report of the president of Cearl to the provincial assembly, recently opened, the total importation of food products into that province during the years 1567-157-256 sacket, beans 38,100 sacks; corn 106,644 sacket; rete 188,06 sacks; jetken leef 207,243 larket; codifish 33,972 barricks; and wheat flom 76,048 harrels. Previous to the artic the importation of these articles was small as not to be noticeable.

There are now ahout 14,000 destinte people employed on the "famine roads" of Ceará, whose work amptorts a population of ahout 50,000.

work anjports a pojultation of aliout 50,000.

—Our latest advices from Rio Grantel de Soil state that the people of that city, Porto Alegre and Polesa were making extensive preparations for the reception of ex Miniser Silviera Martins, who was expected shouly to make a visit to his native province. The Germans were also preparing to welcome him, because of his efforts in behalf of the fall carlamachi-ment of non catholics.

The deman reception of the company of the property in the company of the

—The damages occasioned to public properly i Rio Grande by the storm of the 9th nll., is estimate at 56,000%. No estimate has been made upon the damage flone to private property, which was very

According to a Parana paper of the 24th ult, a large number of Italian colonists arrived at the port of Desterro from the Brusque colony, with their families, on the 2xts ult, expecting to find an Italian steamer which would take them back to Europe. These people have been in the province some year, and are throughy acclimated. And still we are told that the present system of colonization is all right!
